Projektangebot

Braunschweig 31.03.2016

US-amerikanischer Pharma Konzern – SAP Master Data Management Specialist

Im Bereich Medizintechnik für einen Standort im Ruhrgebiet suchen wir per sofort für 6-12 Monate einen freiberuflichen Spezialisten zur Anlage und Pflege von SAP Material-Stammdaten und Stücklisten in einem Produktionsumfeld für ein dezidiertes Projekt

Vorkenntnisse im Bereich SAP Material-Stammdaten und Stücklisten sowie fließende Kenntnisse der englischen Sprache sind ein Muss!

Duties:

- Work in a project to develop processes to create and maintain material master data and bills of materials in a production environment (special purpose machinery), lead sub projects or work packages
- Master Data / Bills of materials (BOM)

Create and maintain material master data and BOM for Operations; this includes:

Projektangebot

- Lead materials / BOM creation process in the Operations organization
 - Interact with various stakeholders in Engineering and Operations to provide a full set of data that allows effective and efficient Manufacturing and Supply Chain processes
 - Being able to review drawings/specs and understand relation to material master / BOM and impact to Supply Chain processes, especially MRP
 - Create and modify materials and BOM
 - Classify materials during creation process (e.g. spares, categories)
 - Proactively identify issues with data and take corrective and preventive action
 - Run analyses, interpret data and present conclusions
 - Support and train others with regard to material master and BOM processes
- Document and monitor standards and procedures related to the use of the ERP-system and document control
 - Document Control Support
 - Check completeness of documents during release and change
 - Provide documents and information to subsequent departments
 - Actively support engineers during release and change of all types of engineering documents
